

SUNVISOR ATTACHMENT FOR VEHICLES AND METHOD FOR MAKING THE SAME

Abstract

The present invention provides for an improved sunvisor attachment, and to a two shot molding method for making the same, having a reduced number of parts and that is adapted to be coupled to a sunvisor for use as a sunvisor assembly in a vehicle. To this end, the sunvisor attachment includes a body and a cover with each including at least one integrally formed connecting member being pivotally coupled together so that the cover may be opened and closed to uncover and cover a mirror and/or light.
